

Corrigendum-1

Dated: 30.12.2025

<u>SN</u>	<u>Points for technical evaluation (Must conditions)</u>
<u>1</u>	The Employee Portal (web interface) will be accessible only within AIESL intranet/network and will not be exposed to internet. Hence, procurement or deployment of public SSL/TLS certificates is not required for web portal. The mobile interface, however, must be accessible from outside AIESL network, similar to a standard mobile application, and should be designed with appropriate security controls for external access.
<u>2</u>	Bidders are required to submit a detailed Presentation (PPT) clearly outlining complete features and functionalities of Employee Portal, in accordance with Scope of Work specified in this tender. Further, bidders shall also attach screenshots of actual product/application proposed to be deployed under the scope of this tender.

Non-submission or submission of incomplete information may render the bid liable for rejection during technical evaluation.
